## Pier collapses, seawalls breached, homes flooded as big waves, historic high tides hit California

*November 26, 2026* ***Los Angeles Times*** reported: "Coastal California communities were deluged Wednesday by powerful waves and record-breaking high tides, breaching seawalls, flooding some homes and causing a chunk of a pier south of San Francisco to collapse amid 20- to 30-foot waves.

*Historic Pacifica Pier*

The damage was greatest in the coastal town of Pacifica, where relentless waves sent water streaming down several city blocks and collapsed a section of the historic pier. A massive swell of ocean water struck the perpendicular portion of the L-shaped pier, causing the vertical supports to suddenly buckle.

King tides — fueled by a historic El Niño, record hot ocean temperatures and strong swells coming from the west — set all-time high tide levels in parts of Southern California, flooding multiple homes in Orange County.

"This El Niño is unprecedented with its strength," said San Mateo County Supervisor Ray Mueller. "For this to be happening when it is a beautiful day on the coastside today, in clear sunshine and no wind, is really significant."

As salt water poured over carefully-lined rows of sandbags and inundated multiple homes in Pacifica — where floodwaters were knee-high on some streets by midday — Mueller told The Times that pumps that were supposed to remove floodwaters were all operational, but overwhelmed by the amount of water coming over the seawall.

"They're having a hard time keeping up with the water that's coming over," Mueller said, noting that local officials will need help with the recovery. "We really are going to need resources to shore up this entire area. And frankly, these pumps are going to need to be fixed as well, so that they're operating better…"

## Iranian sleeper cells activated in U.S. to assassinate Trump, his family and top officials, says Israel defense minister

*November 25, 2026* ***World Net Daily*** reported: "Iranian sleeper cells inside the United States have now been activated with a mission to assassinate President Donald Trump, his family and top American officials, according to Israel's Defense Minister Israel Katz. "There is a danger to the president and his family. An order has been issued there to eliminate them," Katz told a press briefing Tuesday, according to Israel National News.

Iran International indicated Katz said "Iranian-linked cells were operating inside the United States to target senior American officials, warning that Trump and his family were at risk."

The disclosure comes on the heels of numerous reports about Tehran placing bounties on the heads of Trump family members. "Iranian state media broadcast a chilling three-minute video fantasizing about killing Barron Trump in a disturbing escalation against President Trump and his family," the New York Post reported.

"The clip titled 'Where to kill Barron Trump' claimed to show the movements of President Trump's 20-year-old son, claiming he is 'fully monitored' and showing depictions of the dorms at New York University's Constance Milstein & Family Global Academic Center, according to a translation of the video by Euronews."

"The segment claims a $10 million bounty has been placed on the U.S. president's youngest son, with a voiceover claiming 'many would be willing' to assassinate him."

"It further stated that it uncovered Barron's accounts for Xbox, FIFA video games, and Discord, as well as those of his classmates, naming two of them…"

## Israel Presses US on Preemptive Strike to Thwart Iran Chemical Threat

*November 25, 2026* ***Newsmax*** reported: "Israeli Defense Minister Israel Katz said Tuesday that Israel must be prepared to launch a preemptive military strike against Iran, preferably with U.S. participation, to prevent Tehran from developing the capability to attack Israel with chemical weapons.

The warning comes amid concerns that Iran has been emboldened by U.S. midterm election results that its leaders have portrayed as a repudiation of President Donald Trump's war against the Islamic Republic.

Recent U.S. intelligence reports also have raised fears that Tehran could be planning an unconventional weapons attack, potentially involving a dirty bomb or chemical agents, in Washington, D.C.

Katz indicated that Iran cannot yet carry out a chemical weapons attack against Israel but argued that military action should be taken before it acquires that capability, The Jerusalem Post reported.

He declined to specify how far Iran had progressed or what types of chemical weapons it was developing, suggesting the timing of an offensive could depend on Trump's willingness to participate…"

**Germany taking seriously reports Russia may be planning to launch nuclear weapons into space**

*November 23, 2026* ***The Guardian*** reported: "The German government has said it is taking very seriously reports that Russia may be planning to launch a satellite armed with a nuclear weapon into space later this year.

The move – if confirmed – would be a breach of 1967 Outer Space treaty of which Moscow is a signatory as well the 1963 Partial Nuclear Test Ban treaty – which prohibit the placing of nuclear weapons in Earth's orbit and test detonations in space.

The reports by a group of German media outlets, based on what they said were assessments by western intelligence agencies, come amid a recent rise in concern over the increasing militarization of space which had the US Air Force secretary, Troy Meink, admit for the first time in September that Washington had deployed "on-orbit space control weapons".

Germany's Bundesnachrichtendienst (BND) intelligence service and armed forces have exchanged intelligence showing that a Russian satellite, named Sputnik-S, was assembled several years ago and is stationed in the Moscow region, a report by broadcasters NDR and WDR, and newspaper Sueddeutsche Zeitung said.

According to the reports, warnings in early November said the satellite could be launched within 60 days and would be operational shortly afterwards.

"No, we haven't seen the report. But there are so many 'alleged' and 'possible' claims in it, attributed to who knows whom, that it's certainly hardly worth taking them seriously," Kremlin spokesperson Dmitry Peskov told reporters…"

**Australian Jews considering leaving as antisemitism rises, Steven Lowy warns**

*November 20, 2026* ***The Jerusalem Post*** reported: "Australian Jews are now asking themselves a question that generations of Jews before them have been forced to confront: Is it time to leave?

For Steven Lowy, the prominent Australian businessman, philanthropist and former world chairman of Keren Hayesod-United Israel Appeal, the fact that Jews in Australia are even considering leaving the country should serve as a warning about the direction Australian society is heading.

"It is shocking to know that in 2026 Australian Jews are contemplating the same decision – to stay or to go – that other Jews, in other places, have been forced to make down the centuries," Lowy said Thursday during his keynote address at The Jerusalem Post Australia Summit in Sydney.

"The fact that it is now very much a live question shows the extent to which Australia has been diminished as a safe haven for all its citizens," he said…"The fact that Jews are contemplating leaving these countries should worry every Western democracy," he said. "No country ever has benefited when Jews leave."…"

**'Incompatible with our Constitution': Legal team pushes to protect Americans from secret Sharia court judgments**

*November 19, 2026* ***World Net Daily*** reported: "A key legal team, the civil and religious rights experts at the American Center for Law and Justice, are pushing for a key state move that would provide protections for Americans from secret Sharia court rulings and judgments. Sharia, the society-controlling scheme outlined in the Quran, is used by Muslims. But there also have been repeated attempts to impose its requirements on those of other faiths.

One such incident developed in Ohio, where a Sudanese divorce certificate was used against a woman by her husband. She never was served with the paperwork, and ultimately the state's Fifth District court refused to recognize the validity of those claims.

The ACLJ now has confirmed it is submitting testimony in support of Ohio Senate Bill 380. It would protect state residents "from foreign laws, judgments, decrees, and agreements that violate rights secured by the U.S. Constitution, the Ohio Constitution, federal law, or Ohio's fundamental public policy…"
